C300  
SERIES

Sit Well, Think Better

# Design Concept

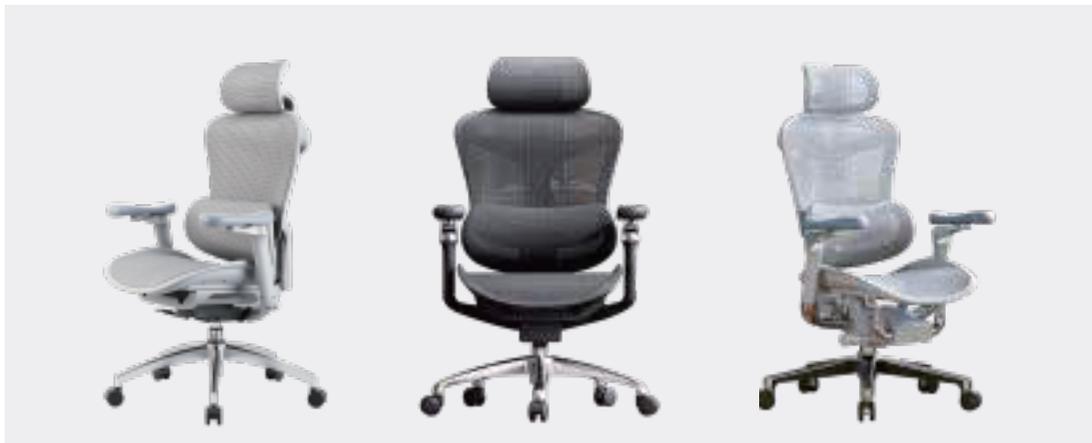

Inspired by the powerful and graceful curves of the African Kudu antelope, the Sihoo C300 seamlessly integrates nature's elegance with advanced ergonomics.

We've harnessed the captivating arcs of the Kudu, infusing them into every aspect of the chair's design.

# Description

While remaining true to Sihoo's signature aesthetics, we've elevated the design to offer a striking visual appeal.

But it's not just about looks. Our chair boasts advanced three-tier back support, a pioneering Bionic 6D armrest, and industry-leading 3D dynamic lumbar support.

Embracing the philosophy of "Body Movement Tracking Design", the Doro-C300 envelops users, creating an intuitive seating experience that truly resonates and adjusts to individual comfort needs.

## Doro-C300

### Achieved 9 technological innovations

- Domino**  
Dynamic Lumbar Support
- 6D**  
Bionic Armrest
- Smart**  
Weight-Sensing Mechanism
- Adaptive**  
Motion Tracking Backrest
- 135°**  
Seat-Back Synchronized Recline
- Wide-Angle**  
Flex Headrest
- One-Touch**  
Control System
- Waterfall**  
Inspired Seat Cushion
- Cloud-Like**  
Mesh Upholstery

## Precision-crafted Flex Headrest

Seamlessly adjust the headrest up and down, back and forth, or rotate, ensuring precise support for your neck and head.

## Bionic 6D Armrest - A World's First

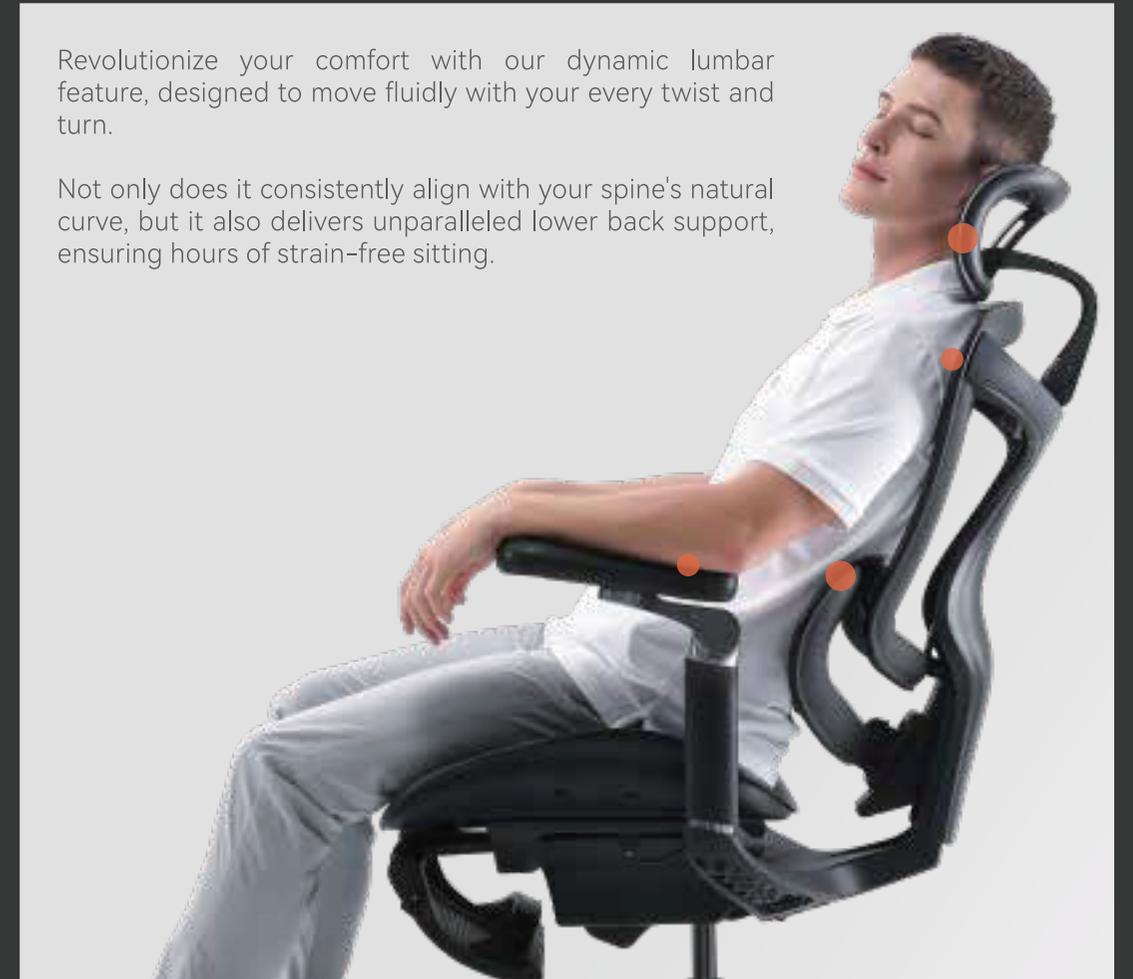

Dive into unmatched comfort with this soft and thick armrest. Adjust it up, in, out, back, forth, and rotate in every conceivable direction, even tilting upward by 35°

## Domino Dynamic Lumbar Support. Marvel With Super Comfort

Revolutionize your comfort with our dynamic lumbar feature, designed to move fluidly with your every twist and turn.

Not only does it consistently align with your spine's natural curve, but it also delivers unparalleled lower back support, ensuring hours of strain-free sitting.

### Radial contact module

Fit the body  
relax and wrap the waist

### Slope guide tracking module

Move with you  
slide and chase your waist

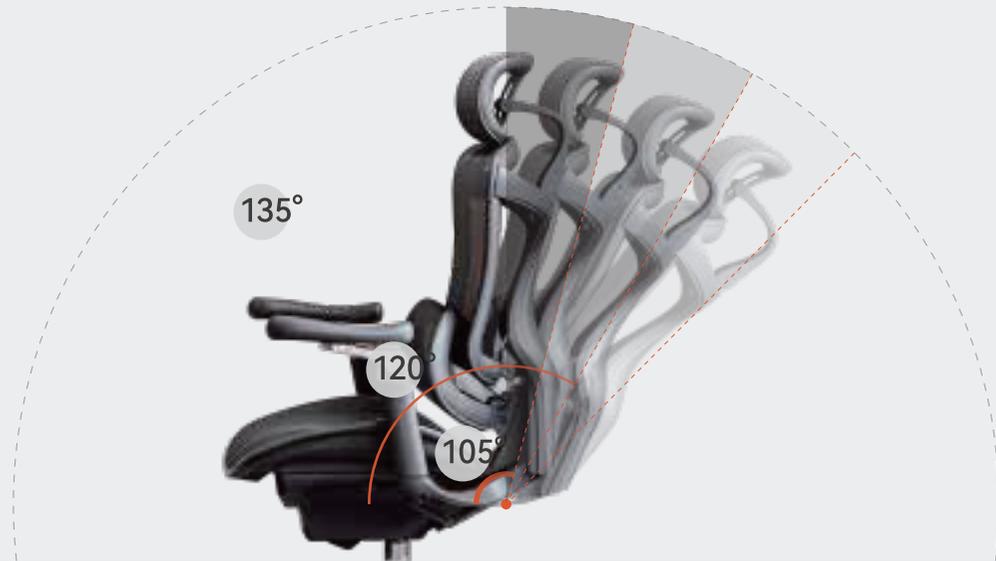

### Pressure sensing feedback module

Fine strain  
elastic support

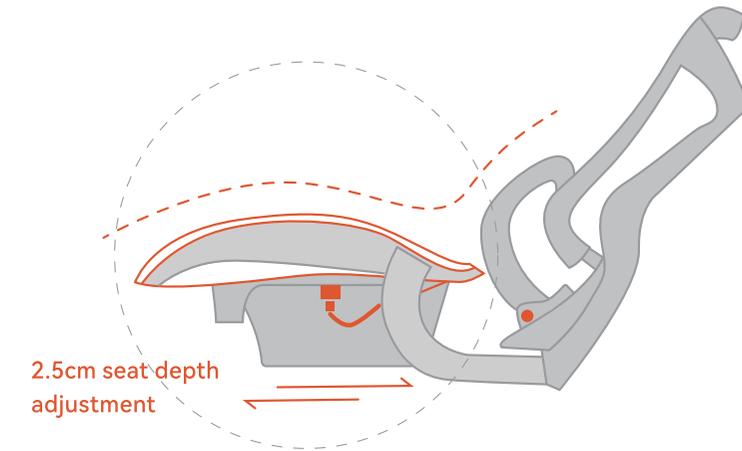

## Seat-Back Synchronized Recline

Never compromise on body support. As you lean, the seat coordinates with the chair back, ensuring you remain supported at the perfect angle.

## Waterfall-Inspired Seat Cushion

Crafted to resemble a waterfall's curve, it efficiently distributes weight, reducing pressure on thighs and hips. Plus, its adjustable seat depth is tailored for a diverse range of body types.

## Adaptive Motion Tracking Backrest

Move freely and confidently

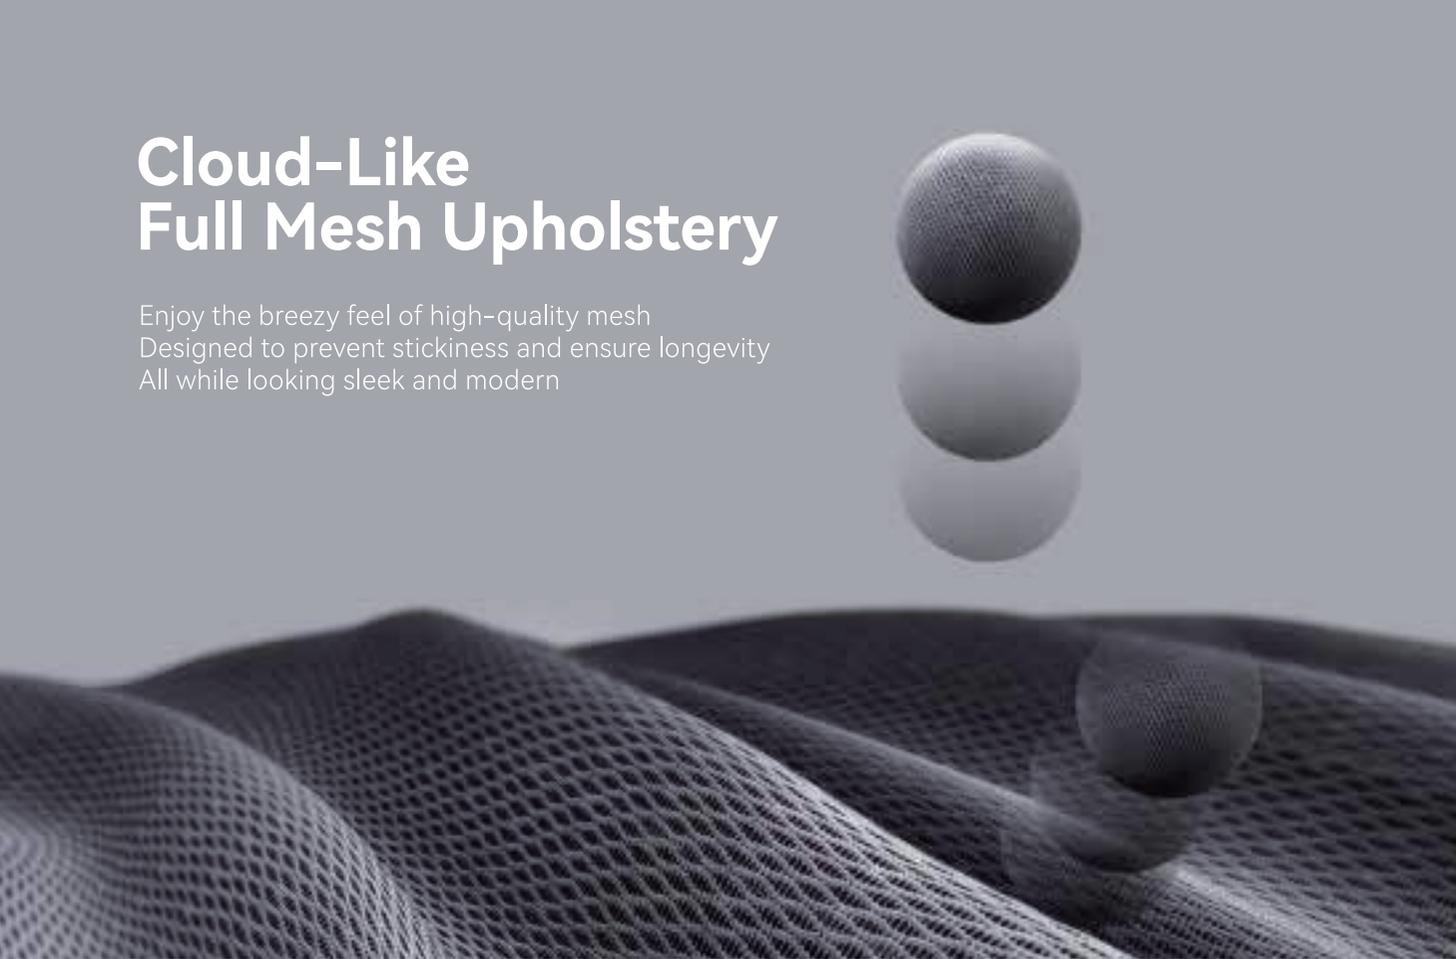

## Smart Weight-Sensing Mechanism

Harnessing gravity and mechanical technology, this feature ensures everyone experiences tailored comfort and ease when reclining.

# Cloud-Like Full Mesh Upholstery

Enjoy the breezy feel of high-quality mesh  
Designed to prevent stickiness and ensure longevity  
All while looking sleek and modern

# One-Touch Control System

Adjustments are more intuitive than ever. Conveniently located on the right side, make your seating experience precisely fit your needs.
