# Product introduction

Sihoo's M57 chair, often called the "hexagonal warrior" of ergonomic chairs, expertly balances support, adaptation, quality, comfort, function, and aesthetics. With over 300,000 satisfied users and a 96% approval rating, it's a top choice.

Featuring an integrated bionic support backrest, a seat cushion designed for comfort, adjustable lumbar support, flexible seat height, 3D armrests, and three recline positions, it accommodates users of varying heights and is perfect for office, conferences, studying, and relaxation.

## M57 SIHOO

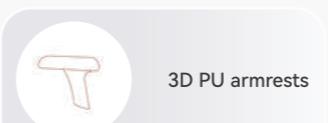

Height and angle  
adjustable headrest

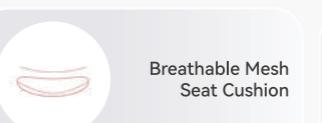

Integrated  
S-shape backrest

2D adjustable  
lumbar support

3D PU armrests

Breathable Mesh  
Seat Cushion

110°-130°  
three-position  
tilt back angle

## Height and angle adjustable headrest

It can rotate up and down, adjust flexibly, fully fit the cervical vertebra, and help you release the cervical vertebra pressure.

## Integrated S-shaped backrest

Integrated diamond-shaped patented design, the back frame provides scientific support for the back, and the S-shaped backrest and polyester mesh not only provide strong support, but also fit the physiological curve of the human waist, thus making your healthier.

## Effectively adjustable Lumbar Support

2D lumbar support, allows you to move freely up and down, front and back to adapt to the lumbar needs and provide strong support for the lumbar.

## 3D PU armrests

The armrests have thick and soft padding, are very comfortable, it can move up and down, back and forth and swivel 34°, making them ideal for resting your arms in various positions while you work.

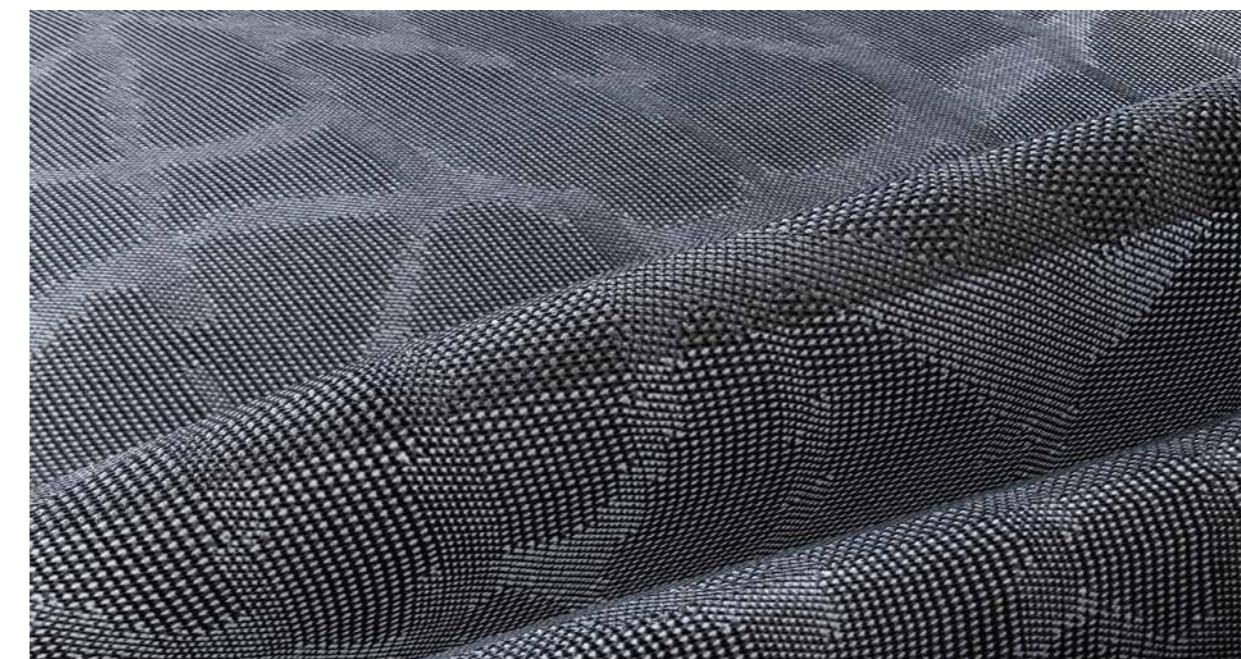

## Breathable Mesh Seat Cushion

High-density mesh, feeling comfortable and soft when sitting down. Waterfall cushion that fits the physiological curve of the buttocks, and the front of the cushion contains high elasticity shaping cotton, It can effectively relieves the pressure on the buttocks and thighs and reduces the sense of pressure.

## Breathable and comfortable mesh

PE+Polyester mesh features breathability, elasticity, softness and material durability.

# Scientific reclining angle

The chair provides multiple reclining angles to accommodate various preferences and needs. You can adjust the backrest to a 110° curve, which is more ergonomic than the standard 90°, providing better support for your waist. For different scenarios, you can further recline to 116° for a relaxed sitting position or to a fully reclined 130° position for a comfortable and rejuvenating rest.
